C01_1 Introduction

01-0 INTRODUCTION

REPORT: (author/date: RGB/2022.04.05)

Solsunsets is a pixel art NFT collection of 4,444 generative landscapes inspired by the aesthetics of the 80s popular culture, nostalgic childhood memories, obsolete technologies and jazz fusion.

It is a singular project by having all its core functions centralized in one single person—every part of this project was idealized, created and developed by myself, RGB, with the purpose of nurturing artistic and community values of NFTs in Solana.

Vision

Or an Art Manifesto

Title: ArtMap 2.0

001_3 Vision

01-1 VISION (OR ART MANIFESTO)

We are all equal once the Sun shines upon all alike.

We want to sing by the beauty of the depth sight and
the silence of the landscapes.

We share the stories behind our landscapes and
characters with the imagination of the spectator.

We advocate cooperation instead of competition.

We accept appropriation and re-contextualization as
an essential gesture of creation.

We are interested in the playfulness of the NFTs.

We trust our long-term value.

002_0 What we have done...

A SUNNY OVERVIEW

What we have done so far

REPORT: (author/date: RGB/2022.05.03)

As an art-oriented project intimately connected with its artist, Solsunsets has been evolving as a living project, growing with the community's inputs and RGB's creations. Since its launch on Nov 11th, Solsunsets is being developed under the following **core values**:

--PRODUCE VALUE BY THE LEVERAGING OF ART

--BENEFIT OUR COLLECTORS BY SCALING

--UNLOCK THE POTENTIAL OF METAPLEX'S MULTIPLE AND MUTABLE METADATA

02-0 WHAT WE HAVE DONE SO FAR

02-1 PRODUCE VALUE THROUGH THE

LEVERAGING OF ART

Sci-fi Series

So far, 16 1/1 pieces inspired by Sci-fi movie landscapes were auctioned. You can view all of them on [ExchangeArt](#)

Collabs & Honoraries

Until now, more than 10 1/1 collab and honorary pieces were produced with the purpose of connecting communities. You can check them [here](#)

02-2 BENEFIT OUR COLLECTORS

BY SCALING

Greek Temple Airdrop

120 Solsunsets SE (Special Edition) were airdropped to eligible collectors on Dec 25 2021 [Marketplace](#)

Industrial Valley Airdrop

276 Solsunsets SE were airdropped to eligible collectors on April 3 2022 [Marketplace](#)

02-3 UNLOCK THE POTENTIAL OF METAPLEX'S

MULTIPLE AND MUTABLE METADATA

The Columns and David Columns Mutation

Collectors of Solsunsets with 'Column' or 'David Columns' traits were able to claim the mutation to destroy them.

Unrevealed SE

20 Unrevealed SE were able to be mutated into animated versions of any of the collector's Solsunsets.

CHALLENGES FOR A LANDSCAPE ART PROJECT
--

Challenges
for a
**landscape
art project**

The cultural shift made by NFTs is less related to what artists can do with it--as in previous technological transformations, such as the invention of the printing press or computer generated imagery--and more related to how digital ownership can transform the relationship between image and people who use it as avatars of an identity built and chosen by their own. Beyond the mere financial interest as a speculative asset, the increasing interest on NFTs has been naturally growing through their identity and community potentials, such as: -----

- Freedom through anonymity--anyone can be whatever they want;
- Connect people who think alike and share the same values or interests;
- Self-expression through a project that presents how people want to be seen;
- Display of purchasing power with highly-priced avatars;
- Identity building through something people can connect with;
- Display of the status of being part of a selective society.

Title: ArtMap 2.0
C03_1 Challenges

CHALLENGES FOR A LANDSCAPE ART PROJECT

Challenges for a landscape art project

It is pretty clear that a successful NFT project is built by the community that grows around it, and not by something replicable or predictable by developers or artists. It is quite challenging for a landscape project to build a community--more than it is for a PFP project--since a landscape NFT is not commonly used as an avatar nor related to any specific identity. However, the fact that Art can create a strong and emotional attachment is what made possible to grow such a loyal and organic community.

Title: ArtMap 2.0
C04_0

WHAT COMES NEXT

WHAT
COMES
NEXT

Beyond a landscape art project

As a landscape art project, we can cover some of the potentials mentioned, but why should we limit ourselves if we can go even further? What makes Solsunsets unique is not the landscape itself, but its core artistic values and a truly wholesome community. It is about how we can build together stories behind each artwork, unlocking the infinitude of feelings and connections that art makes possible.

C04_4

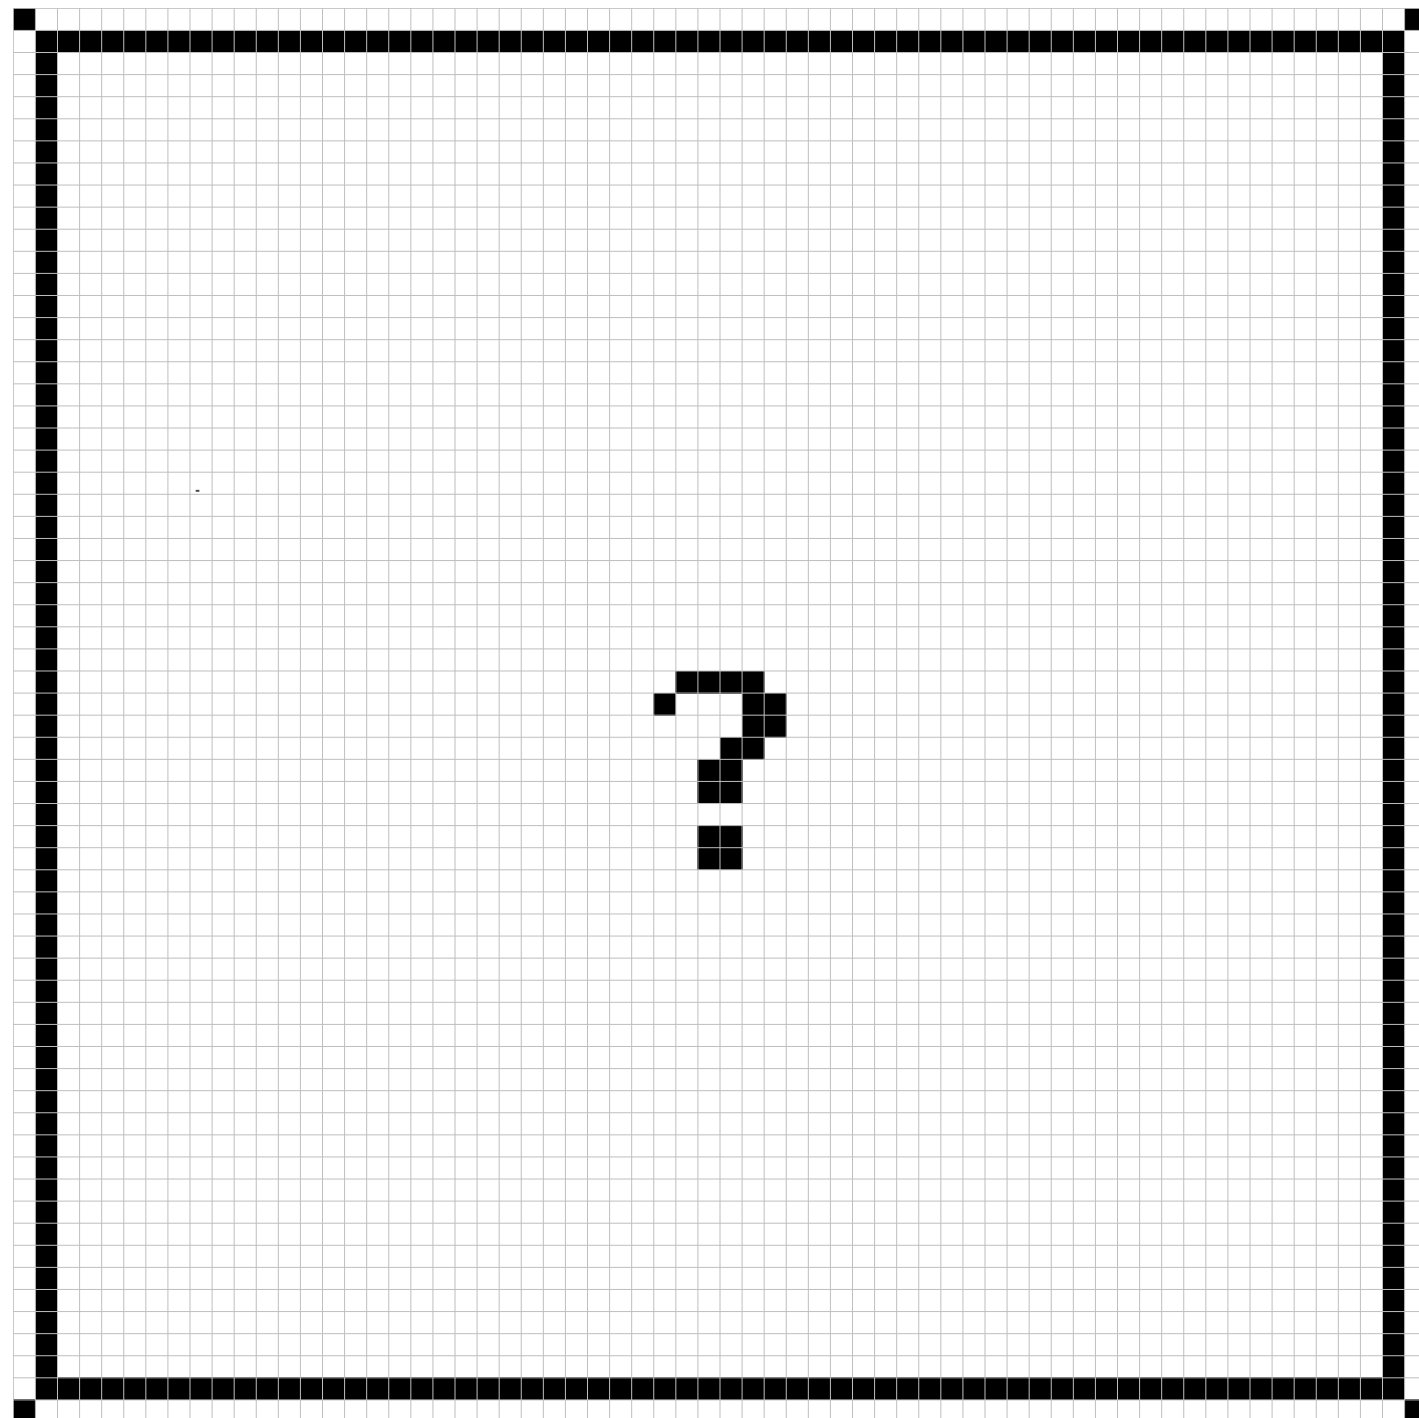

FIGURE 8 - A 64x64 pixels canvas with a "?"
 dimensions: 64x64px (original)

CRITTERS CULT

The Critters Cult aims are:

- to be community-oriented under our core values and art quality;
- to be stunning;
- to be world-building and lore-oriented;
- to be universal and unique;
- to reward our early collectors;
- to be distinct and notable;
- to be a stand-alone project and reach people beyond our current Solsunsets community;
- not to be a 'niche' supply (we want to grown community) nor a big supply that would dilute interest and weaken the community;

SUNSETS SAGA

NOTES:

S:S

The Sunsets Saga will be a new landscape collection with all the knowledge and skills acquired through the production and experience of Solsunsets applied.

As the Critters Cult (C:C), the Sunsets Saga aims not only to have a stunning and beautiful artwork, but also to be a world-building and lore-oriented project connected with Critters Cult;

FIGURE 9 - Screenshot-Mon-May-02-2022-11-11-11-PM-UTC

Title: ArtMap 2.0
C04_7

SUNSETS SAGA

The Sunsets Saga will not focus on being a multi-asset & multi-ratio NFT as the genesis collection.

Instead, the artwork will be **fully crafted on a 3:1 format** in which the compositions will be carefully planned to display all elements even on a centralized 1:1 crop. (Figure 10)

The trait's **colors will dynamically change** according to sky's color, to give a more natural color scheme. (Figure 11)

To shelter these collections and make the distribution possible, we will develop under the brand name **SunS** and will be fuelled by our native token, **Pixels**.

SUN_STUDIO

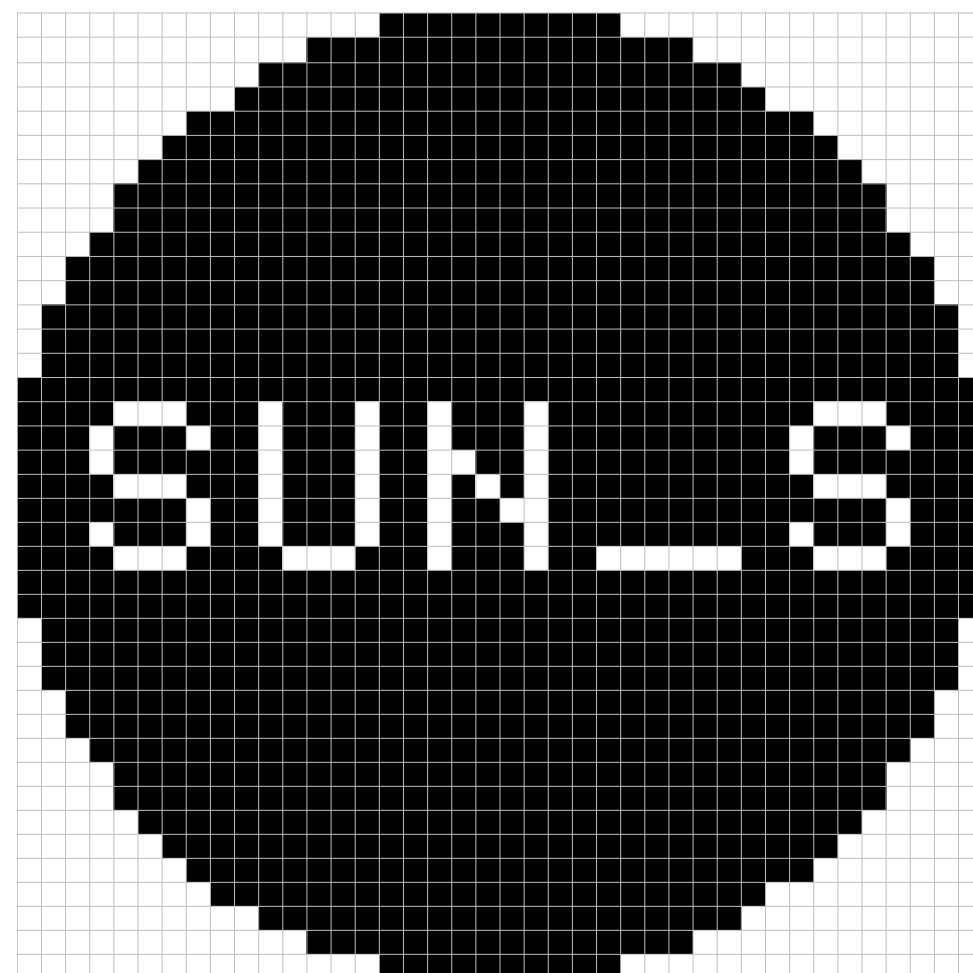

FIGURE 12 - The Sun Studio Logo in a circle
dimensions: 40x40px (original)

To be more flexible and consistent on integrating new developments and projects, and to reinforce our art-oriented spirit, we have created the Sun Studio, the brand that will host Solsunsets, Critters Cult, Sunsets:Saga and all future RGB art creations.

The creation of the Suns also opens up more possibilities and gives a strategic artistic freedom for 1/1 art, collaborations and partnerships, keeping the core values of the artist and still bringing visibility to all the studio's projects as a whole.

PIXELS

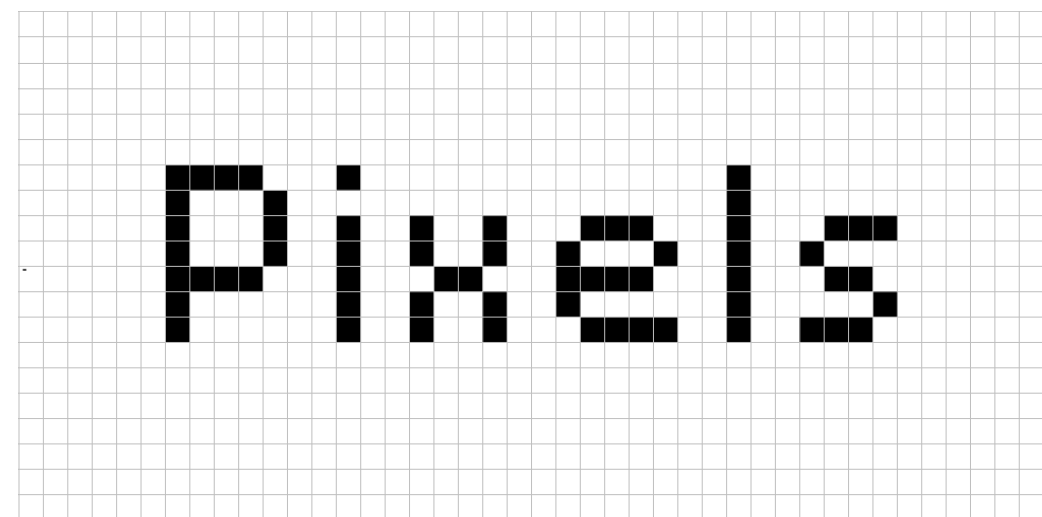

FIGURE 14 - The Pixels Token Logo

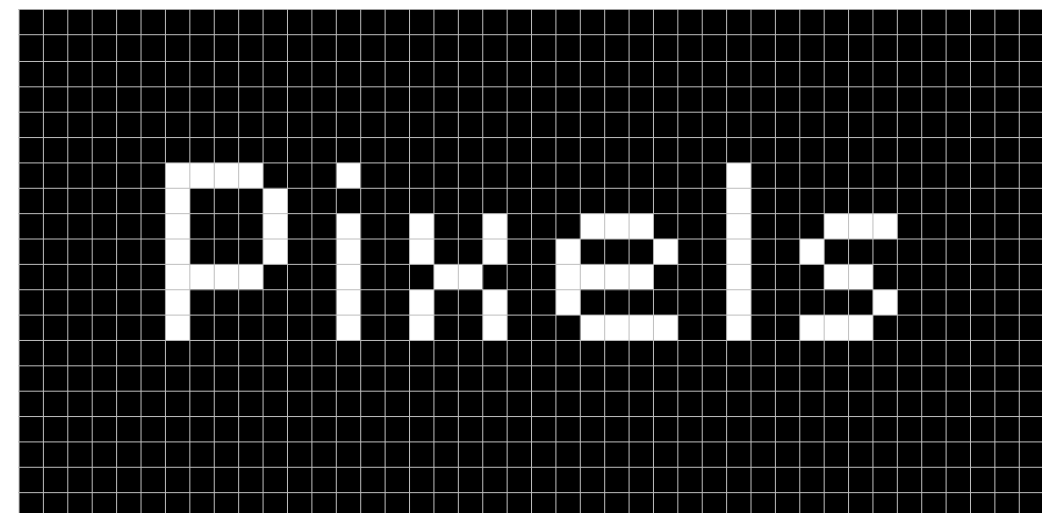

FIGURE 15 - A Pixels Token Logo white

To facilitate the integration of future projects, mutations, small drops, Limited Editions and auctions, we will start using a native token, Pixels, earned daily by any Solsunsets or Solsunsets SE collector. Pixels will not have any intrinsic monetary value (1 Pixel = 1 Pixel), no liquidity pool, and there will be no artificial rewards or complex mechanism to increase interest such as locking periods in staking or any kind of boost.

It will work on a simple math basis of 1 Pixel a day per Solsunset, available to be claimed by our collectors at any time they wish.

With Pixels, collectors will be able to:-----

Pixels

- Mint future collections;
- Mint/Purchase small exclusive drops;
- Purchase Solsunsets at our own marketplace (TBA);
- Print copies of a Limited Edition;
- Participate of exclusive auctions;
- Claim mutations;
- Trade on Famous Token market.

Title: ArtMap 2.0
C08-0 Common Questions

A SUNNY OVERVIEW

Common questions

Title: ArtMap 2.0
C08-1 Common Questions

COMMON QUESTIONS

JUST SUNSETS?

As we don't need to limit our creations to one blockchain--on the contrary, a cross-chain integration is desirable--the reference to Solana (Sol) will not be part of the main name of our future collections any longer. It is a strategic movement to make room to grow in the long-term.

HOW CAN I EARN PIXELS?

Snapshots of our collections will be taken every 24 hours, and a new amount of Pixels will be available to be claimed every week. There's no need to stake, just to keep your Solsunsets on your wallet.

HOW CAN I CLAIM PIXELS?

The claim tool will be open on our website by the middle of May.

WILL THE FUTURE COLLECTIONS BE OPEN TO PUBLIC MINT?

Yes, there will be hybrid launches, part to be minted with SOL and part with Pixels (prices to be announced closer to launch). Also, Pixels will be available to be traded on Fox Token Market, so there will be no price disadvantages against Solsunsets collector--anyone will be able to negotiate Pixels.

WILL THE NEW PROJECTS HAVE THEIR OWN DISCORD SERVERS?

No, our current Discord server will be adapted in a near future to welcome new members and projects without losing its soul.
